DEMO WALKTHROUGH · PLAYS AUTOMATICALLY

A patient's journey through the hospital, paper vs. software

Follow Ramesh Kumar, 54, who arrives with chest pain. Each step shows the paper form a typical hospital uses today and what your system should do instead. OPD patients leave after billing; admitted patients continue through the ward and discharge.

PAPER FORM TODAY

CityCare Multispeciality Hospital HD-01

VISITOR / ENQUIRY SLIP

Name	Ramesh Kumar
Purpose	Chest pain, see doctor
Referred by	Self
Directed to	Registration counter 2

STEP 1 OF 14 · OPD

Arrival & enquiry

Patient Help desk

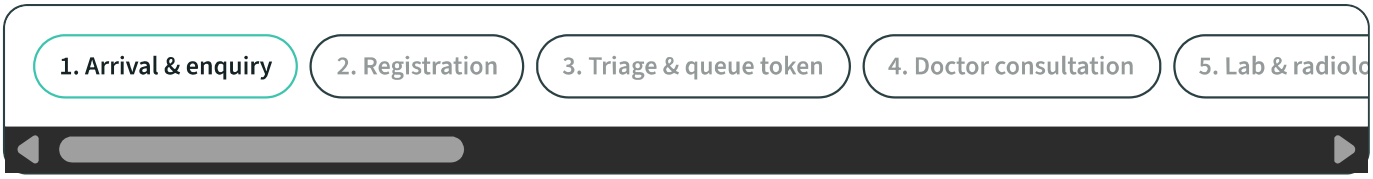

The patient walks in or calls. Help desk staff check whether this is an emergency and point them to registration.

WHAT YOUR SYSTEM DOES

- Online / app appointment booking before arrival
- Kiosk self check-in with phone OTP
- Emergency flag routes straight to ER

DATA CREATED

Lead, appointment, visit intent

Steps 1–8 are the outpatient (OPD) path. Steps 9–14 apply when the doctor decides to admit. Emergency patients enter at step 3 and register later.
